

AcuteNet SaaS Products are designed to deliver robust workflows with standard capability to connect to industry data bases and as well customer databases to address the specific information needs. AcuteNet SaaS products are empowered by AcuteNet Data Collection Management Framework (ADCMF) to ensure the protection of sensitive information in accordance with privacy legislation and delivered in collaboration with:

- [GeeksForLess](#) – The provider of AcuteNet human capital
- [RedHat](#) – The provider of AcuteNet underlying technology
- [Dell](#) – The provider of AcuteNet private cloud infrastructure

ADCMF data storage algorithm is (Federal Information Processing Standards) compliant with all sensitive clinical assessment data encrypted using AES (Advanced Encryption Standards). AcuteNet SaaS products utilize industry best practices such as InterRAI, CIHI and 7 Principles of Privacy by Design to provide AcuteNet customers with the benefit Health Care Industry best practices in addition to the power of cloud computing and innovation of Software as a Service (SaaS) capability through the following features:

- Scores, CAPs and Outcomes are calculated and presented on the fly
- Flexible CarePlans module
- Cloud Based and Mobile Enabled Application
- Assessment data is saved automatically in real time in on-line mode or once the network becomes available in off-line mode
- User friendly interface with Touch and Tap Navigation Support
- Built-in National Drugs Database
- Built-in WHO ICD-10 Database
- Self-descriptive form fields
- One click history from previous forms for every field
- One click history Report View
- Insert custom assessment forms without any development
- Easy Integration with 3rd party applications

Through ADCMF, AcuteNet provides users with over 25 Clinical Assessment form digitization and workflow management capabilities including:

1. APR – Automated Provider Report
2. SOT – Supply Order Tool
3. WMLT – Work Load Management Tool
4. COT – Clinical Observation Tool
5. KPI – Key Performance Indicators
6. CP – Care Plan
7. WC – Wound Care
8. WA – Wound Assessment
9. WCA – Wound Care Assessment
10. OASIS – Outcome and Assessment Information Set
11. RAI-MDS 2.0 – Resident Assessment Instrument – Minimum Data Set
12. MDS-MH – Minimum Data Set – Mental Health

13. MDS-HC – Minimum Data Set – Home Care
14. OCAN – Ontario Common Assessment of Need
15. interRAI HC – Home Care
